

Agriculture Profile

Employment Nelson-Tasman

Introduction

Farming is a high tech industry that is always looking for good workers and farming careers are there for anyone who wishes to take advantage of the excellent support and opportunities that are available.

Agriculture in the Nelson region is made up mainly of dairy, sheep and beef farming. Dairy production is also on the increase.

Employment in the Industry

Approximately 2500 people were employed in agriculture in this region during the year 2000.

- ◆ Dairy manufacturing offers great careers and is one of New Zealand's largest international businesses including management, marketing, technology and dairy factory operation.
- ◆ The outlook for farming is very good with a recent increase in the profitability of dairy farming.
- ◆ The Nelson region has 14 town supply dairy farms that milk all year round, and 220 factory supply farms that milk over the summer months.
- ◆ Meat processing offers excellent career prospects either locally, nationally, or internationally.
- ◆ Opportunities for employment in sheep and cattle farming vary depending on previous experience though work is generally available for those who seek it.

What Employers Are Looking For

- ◆ The farmers say if you have the attitude, then they can teach you the skills.
- ◆ Employers look for people who are adaptable, reliable, and able to work as part of a team. It is important that farm workers enjoy working with animals, have a genuine interest in the industry, plus enthusiasm for the job.

Current Skill Shortages

- ◆ There is a shortage of workers in the agricultural industry nationwide. Farmers have trouble finding good workers with experience, especially for the dairy sector.
- ◆ Dairy manufacturing needs people qualified in food technology, automation, information technology and transport.
- ◆ Independent farmers – dairy, cattle and beef.
